Ahmed Mohamed Abdelhady

Full-Stack Developer | React · Next.js · Python

joniurabdelhady@gmail.com • +20 100 130 7376 • Cairo, Egypt • LinkedIn • GitHub

SUMMARY

Computer Science graduate (GPA 3.7) and full-stack developer with production experience building and shipping web applications for real clients. Delivered live products including a headless Shopify e-commerce storefront, a bilingual real estate marketplace, and a university faculty website — all built with React/Next.js and deployed to production. Comfortable across the stack, from Arabic-first RTL interfaces to REST/GraphQL API integration and database design. Also experienced in Python and machine learning, with a sign language recognition system (Talkable) as a graduation project. Currently a Teaching Assistant at Sinai University teaching web development courses.

EXPERIENCE

Freelance Software Developer, *Self-Employed* 10/2021 – Present | Egypt

- Designed, built, and deployed production web applications for e-commerce, real estate, and education clients, handling the full cycle from requirements to launch and post-launch support.
- Built Arabic-first, RTL-ready interfaces with responsive layouts, working primarily in React, Next.js, and Tailwind CSS.
- Integrated third-party platforms and APIs, including the Shopify Storefront API for headless commerce.
- Developed backend and database solutions using SQL, .NET MVC, and Python.

Teaching Assistant, *Sinai University* 10/2025 – Present | Arish

- Teach and support core courses including Web Technology, Web Design, Web Client, and Programming 1 for undergraduate students.
- Run practical labs and technical assignments in programming and software development.
- Supervise and mentor student projects, strengthening their coding, problem-solving, and algorithmic thinking skills.

Programming Instructor, *iSchool* 07/2025 – 10/2025 | Remote

- Taught programming and technology fundamentals through interactive online lessons.
- Delivered hands-on activities that helped students build problem-solving and coding skills.

SELECTED PROJECTS

Bakhoor Store — Headless E-commerce Storefront *Next.js · Shopify Storefront API · Vercel* bakhoor-store.vercel.app

- Built a headless e-commerce storefront on Next.js consuming the Shopify Storefront API, deployed on Vercel.
- Implemented an Arabic-first RTL interface with responsive product catalog, category browsing, cart, and checkout flow.
- Managed the product data pipeline end-to-end: catalog structuring, product imagery, and inventory setup in Shopify.

Beet2k — Real Estate Marketplace *Next.js · React · REST API* beet2k.com

- Developed a bilingual (Arabic/English) real estate marketplace connecting property owners, brokers, and buyers in the Egyptian market.
- Built property listing, search, and filtering features with a listing-management dashboard and an admin review workflow.
- Delivered a custom design system and RTL-ready component library from concept through production deployment.

Faculty of IT & CS Website — Sinai University *Next.js · React · Vercel* su-it-gamma.vercel.app

- Designed and developed the web presence for the Faculty of Information Technology & Computer Science, Sinai University.
- Implemented pages for academic programs, departments, faculty staff, and student resources with a responsive, accessible layout.
- Deployed on Vercel with a content structure that non-technical staff can update.

Talkable — Sign Language Recognition System *Python · TensorFlow · Computer Vision (Graduation Project)*

- Developed a system that translates sign language gestures into real-time text and speech to improve communication for people with hearing or speech impairments.
- Built mobile and web interfaces allowing users to convert text into sign language videos and detect signs from images or a live camera feed.
- Integrated and trained machine learning models for sign detection and real-time translation.

Hotel Management System *.NET MVC · SQL Server*

- Developed a hotel management web application with database integration and interfaces for managing services, rooms, and bookings.

School Database System *SQL*

- Designed and implemented a relational database with structured tables and optimized queries to manage student and academic records.

EDUCATION

Bachelor of Information Technology, *Sinai University — Faculty of Information Technology* 2021 – 2025 | Arish, Egypt

- GPA: 3.7 | Graduation Project: Talkable — Sign Language Recognition System.

SKILLS

Languages: JavaScript, TypeScript, Python, C#, C++, SQL, Dart, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, Responsive & RTL Design, REST / GraphQL API Integration

Backend & Data: .NET (MVC), Flask, SQL Server, Database Design, Query Optimization

AI & Machine Learning: TensorFlow, PyTorch, Keras, Scikit-learn, Pandas, NumPy, Computer Vision, NLP, LLMs, RAG, LangChain, Prompt Engineering

Tools & Platforms: Git, GitHub, Vercel, Shopify, Flutter, Visual Studio, Android Studio, Figma

Soft Skills: Problem-Solving, Critical Thinking, Clear Communication, Teamwork, Adaptability, Agile / Scrum

CERTIFICATES & TRAINING

- Artificial Intelligence Program — AMIT
- Artificial Intelligence Training — Huawei & NTI
- Front-End Development Program — Information Technology Institute (ITI)
- Fifth Training Program for Preparing Leaders in AI and Information Warfare — Hashemite Kingdom of Jordan
- Backend Development using Flask (Python)
- Introduction to Python — AITB, 2024
- ICPC Programming Competition Participant, 2023
